

# 101-DE Series

## Delayed Egress Controllers

SDC's 101-DE series delayed egress controllers incorporate all ExitCheck® features into a two piece delayed egress system where the door is closed and secured by delayed egress locking hardware. The 101-DE series delayed egress controller send power to the slave operating magnetic locks or exit devices to the lock the door in a secured position. The integrated digital display on the 101-DE controllers provide an alternating verbal message, verbal countdown and alarm tone, plus a large digital countdown display and door release indicator to provide a clear warning for the safety of persons without prior knowledge of door operation, including the blind and hearing impaired. A built-in three function digital keypad provides alarm and lock reset, and timed or sustained bypass.

**101-DE series delayed egress controllers must be ordered with a magnetic lock or exit device with ExitCheck® slave operation feature to secure the door.** Designed to control up to two doors, order two magnetic locks or two exit devices for double door applications.\*

\*See related products for available magnetic locks and exit devices Consult factory for system design for applications requiring control of a bank of doors.
